Type III: Computer & processor: 4 x Intel (8 cores) or faster Memory (RAM): 32 or above gigabytes (GB) RAM Hard Disk: 500 gigabytes (GB) or more available Monitor: Graphics hardware acceleration requires a DirectX10 graphics card and a 1280 x 1024 or higher resolution monitor Network: 100MB/Sec (Gigabyte network recommended)			✓ ⁹			
Type IV: (IIoT Gateways) Computer & processor: ARM or Intel based CPU or more Memory (RAM): 256Mb or more Hard Disk: 128Mb or more						
Windows Server 2019 v1809+ Memory (RAM in GB): Minimum: 16 Recommended: 32 Cores: Minimum: 4, Recommended: 8 Disk space (GB): Minimum: 64, Recommended: 100						
Notes * In general, AspenTech aspenONE® software license agreements with customers permit use of the licensed software on Supported Computers at customer Sites. "Supported Computers" include computers with a manufacture, model and operating system for which AspenTech offers a supported version of the software, and that are controlled by the customer. "Sites" are customer facilities or locations specified in the license agreement. AspenTech permits customer use of licensed aspenONE software in the cloud where: (i) the Platform Support specifications published by AspenTech for the relevant version of the software product include cloud support; (ii) only the customer has access to the licensed software hosted by the cloud service provider; and (iii) the user is accessing the software only from a Site specified in the applicable license agreement. Cloud deployment does not change any license restrictions, including the restrictions on which regions can access the software. When running software on a virtual machine, the machine should meet the same requirements.	Advanced Process Control (APC) suite consists of the following products: Aspen DMCplus, Aspen DMC3, Aspen Watch Performance Monitor, Aspen PID Watch Performance Monitor, Aspen RTO Watch Performance Monitor, Aspen Inferential Qualities, and Aspen Process Recipe & Aspen Process Sequencer.					

Suite	Manufacturing & Supply Chain Suite					
V11.1 Platform Specifications that are supported	Advanced Process Control (APC)					
	Advanced Process Control (APC) Desktop 32-bit	Advanced Process Control (APC) Online 32-bit	Advanced Process Control (APC) Performance Monitor 32-bit	Advanced Process Control (APC) Web Server 32-bit	Aspen Process Recipe (client) 32-bit	Aspen Process Recipe & Aspen Process Sequencer (server) 32-bit
AspenTech does not support the in-place upgrade of the Operating System (for example: upgrade Windows 7 to Windows 10) with AspenTech software already installed. Our recommendation is to uninstall Aspen Software before upgrading the OS and reinstall it after the upgrade.						
Your Aspen SLM Server must be installed and running prior to installing any V11 product.						
If running standalone, 1280 x 800 is the minimum recommended resolution monitor for servers.						
For SLM server using the Type 1 Desktop configuration, the minimum memory is 4GB with 20GB hard drive.						
Microsoft Active Directory/Domain Services (Required for aspenONE Web Server)						
¹ This configuration is only practical for small scale models and deployments. For most applications, best						
² EDR does not use any database servers. Deploys its own LocalDB database files.						
³ Aspen Batch Process Developer does not support the 64-bit version of Visio. Visio is used in ABPD to generate the block diagram and process flow diagram reports; it is an optional feature. The 64-bit versions of <u>Word and Excel are fully supported by ABPD</u> .						
⁴ When Aspen Utility model is driven by Aspen Online using Local System Account, then SQL Express 2014 is required.						
⁵ When Exchanger Design and Rating is driven by Aspen Online using Local System Account, then SQL Express 2014 is required						
⁶ Aspen Modeler family supports FORTRAN compiler version 2017 or 2019						
⁷ Oracle Java is needed if the 3rd party scheduling application Primavera is used with Economic Evaluation (EE). <u>Primavera is owned by Oracle and its API uses Java.</u>						
⁸ Must be in compatibility mode for Aspen Process Sequencer						
⁹ See "Basic Deployment Recommendations" in Appendix C of the Aspen Manufacturing Suite Advanced Process Control Installation Guide.						
¹⁰ For new installations of APC Web Server, install IIS and JRE before installing APC Web Server						
¹¹ CIM-IO Interfaces can be installed on 32-bit desktops						
¹² This configuration is only practical for small scale models and deployments. For most applications, best deployment practice dictates the use of a separate and dedicated database server for acceptable						

Suite	Manufacturing & Supply Chain Suite					
V11.1 Platform Specifications that are supported	Advanced Process Control (APC)					
	Advanced Process Control (APC) Desktop 32-bit	Advanced Process Control (APC) Online 32-bit	Advanced Process Control (APC) Performance Monitor 32-bit	Advanced Process Control (APC) Web Server 32-bit	Aspen Process Recipe (client) 32-bit	Aspen Process Recipe & Aspen Process Sequencer (server) 32-bit
13 Refer to KB 47648 For more information on configuring SCM products using Azure:						
14 Oracle Database 12.1.0.2 is supported for Collaborative Forecasting, not 12.2.x.						
15 ASCC web applications and the Informatica client will work only with MS Office 32-bit. Informatica Server uses 64-bit Office only.						
16 Non-English OS's are not supported						
17 If using IBM Maximo Adapter						
18 1 If using aspenONE Exchange on Windows Server 2012 R2, you must select the Desktop Experience option during <u>Windows installation to enable Flash training videos.</u>						
19 SLM supported in cloud (Azure VM/Amazon VM) for ENG products that are supported in the cloud						
20 If FIPS is enabled, aspenONE Exchange users must have the latest Windows Update patches installed on their machine.						
21 Office 365 - 32-bit support only						
22 Requires the latest patches of the corresponding AspenTech software						
27 WVD Certification Notes – 1. Publishing WVD apps to users local machine start menu not supported 2. Interoperability with 3rd party products only supported with Office 365 3. Aspen Properties Enterprise Database (APED) via SQL Server not supported 4. The following products have not been certified for WVD: ABE, ABPD, AQL, AVCA						
28 APEM does not support CDB-PDB database in Oracle 12.2. Weigh & Dispense Client 32-bit does not support Oracle						
29 APP-V is only supported with Process Explorer						
30 When you have more than 8 simultaneous users, the recommendation is 2CPU's and 4GB RAM per user. Performance will vary based on product and usage profiles. This can be considered a starting point <u>for large multi-user machines.</u>
